

Management System Conformity Assessment Body

DC-02

Version 1 dated September 9, 2025

QUALITY POLICY STATEMENT

The Management System Conformity Assessment Body (MSCAB) is committed to providing the highest quality certification services and helping clients to develop new markets and expand their opportunities.

We strive to ensure full compliance of our activities with current certification schemes, as well as regulatory requirements and accreditation standards. Meeting or exceeding the expectations of all stakeholders is crucial for us.

We ensure that the entire certification process is conducted confidentially and impartially, in accordance with the contractual requirements agreed upon with our clients.

Our main goals:

- Full compliance with external standards (ISO/IEC 17021-1:2015 and ISO/IEC 17065:2012), regulations (EU Regulation 2018/848) and relevant management system standards.
- Maximum possible satisfaction of all stakeholders, including our clients.
- Running a profitable business while maintaining complete independence from any external pressure.

To achieve these objectives, the MSCAB implements a set of quality control mechanisms using key performance indicators (KPIs) to monitor specific and measurable results arising from these objectives.

The quality management system in the MSCAB, developed taking into account all the requirements of applicable standards and regulations and approved by senior management, is regularly monitored through internal audits and periodic checks to ensure its continued effectiveness.
